

**Non-Toxic • 100% Biodegradable
As Safe As It is Strong**

Green Safe Degreaser is Formulated to Provide the Following Features and Benefits:

- 100% biodegradable (bio-based & bio-preferred) & non-toxic
- Ready-to-use formula, which requires no mixing
- Removes heavy oil, tar, grease and other hard-to-clean substances
- Requires little, to no agitation for quality results and will not cause etching
- A complete safe alternative to toxic ingredients like hydrochloric acid, lye, phosphates and other dangerous petroleum-based compounds
- Easily rinses off all surfaces, and is safe to use on metals, plastic, glass, concrete, asphalt, stone and most other surfaces
- No skin or breathing protection needed
- Non-Flammable & Non-Explosive
- Neutralizes and contains fumes from chemical spills
- Reduces workers compensation claims through reduction in (I) inhalation and eye contact problems, dermatitis and chemical burns
- Replaces ozone depleting substances (ODS) and hazardous chemicals.
- Cuts costs related to disposal of hazardous wastes and protective gear. Eliminates recycling and reclamation costs.
- Reduces labor costs by reducing labor intensive scrubbing and agitation
- Will totally sanitize, disinfect and kill all germs and bacteria on all hard surfaces, when left wet on surface for at least 5 minutes
- De-rubberize touchdown areas on airport runways without damaging white line reflective paint
- Removes machine oils and cutting fluids from manufactured parts and other extruded tubing or unique metal manufactured parts
- Removes ink throughout the printing process, whether for general machine maintenance or roller cleaning

Green Safe Degreaser was formulated to provide cleaning levels equal to dangerous and toxic products containing hydrochloric acid, lye, phosphates and other petroleum-based compounds, while providing complete user safety and is 100% biodegradable. With a 12.8 pH Level achieved during the chemical formulation and manufacturing process, **Green Safe Degreaser** equals the strength of lye and other toxic alternatives in its finished product, to provide the safest and strongest cleaner known to man. The harmful effects and dangers are non-existent when using **Green Safe Degreaser**. **Green Safe Degreaser** is a water-based, clear and odorless product. In a ready-to-use product or concentrate, there is no other cleaning product that provides the strength and safety of **Green Safe Degreaser**.

Specialized Industrial Uses:

- Municipal tunnel and bridge surface cleaning (heavy exhaust)
- Manufacturing, warehouse and service station surfaces
- General “hard-to clean” applications, including utility manhole and vault cleanup/restoration; and exterior building surfaces
- Dip tanks, aqueous-based parts washers, steam cleaners and pressure sprayers
- Manufacturing and auto equipment cleaning and maintenance
- Prepping prior to painting, plating or welding
- Mass transit fleet vehicle and train-car maintenance
- Floor and surface scrubbing and general plant maintenance, and
- General parts and accessory cleaning

Instructions For Use:

This specifically engineered cleaner can be sprayed, poured, wiped and used in conjunction with pressure cleaning, and other parts cleaning systems. Once applied, flush, rinse or remove any residue. This product may require limited agitation and in most cases is effective with rinse only.

Available Container and Case Sizes

1 Gallon (3785.4 mL) container, 4 units per case
5-gallon pail container
55-gallon drum
