

SPECTRUM MAG-LIFT

THE ULTIMATE MAGNETIC MANHOLE COVER LIFTER FOR THE UTILITY MARKET

Place magnet on edge of cover

Push on handle to "break" seal

Pull towards you to remove cover

Push forward to release magnet

Rare Earth Neodymium Magnets

The **Spectrum MAG-LIFT** was ergonomically designed to be the safest, most efficient and reliable compact magnetic manhole-cover lifting device available. As compared to the traditional "Manhole Cover Hook", **Spectrum MAG-LIFT** employs opposite mechanical and leverage principals of "Drag vs. Lift" and "Over-the-Cover" to "Out-of-the-Way", providing a simple, safe and efficient method of removing manhole covers.

Product Features

- Uses Rare Earth Neodymium Magnets that will not wear out
- Innovative Fulcrum designed to avoid "back-compression" and serious injury
- Magnets are encased in impact protection guards
- Durable aluminum handle assemblies
- Storage base protects magnets during transportation
- For various applications from grate to heavy cover removal
- Wide grips for gloved operation
- Heavier lifting capacity
- Extendable handle locates operator outside the explosion zone

SPECIFICATIONS

Part Number	US 30178RT	US 30178SC
Name	Robotron	MAG-LIFT
Lifting Capacity	325 lbs	325 LBS
Magnets used	3	3
Aluminum Chassis	Yellow	Orange
Unit Weight	14 lbs	16 lbs
Base Dimensions	13" x 6"	13" x 6"
Unit Height	34"	34" - 48"
Lifting fulcrum	2"	4"

Both models available in 4-magnet base
